

COP In [MyCity]

Empowering youth
climate change makers
around the world

OUR PROJECT

To bridge the gap between
climate negotiations

(a.k.a. the COPs)

and youth.

OUR OBJECTIVES

- ▶ **Empowering youth** through training and concrete local climate actions
- ▶ **Deepening the interconnections** existing between international climate negotiations and local climate action
- ▶ **Creating a strong international and intercultural community** of young change-makers committed to the fight against climate change

Did you say «COP»?

- The **Conferences of the Parties (COPs)** are annual international negotiations on climate change. They serve as a meeting of the 195 States of the United Nations Framework Convention on Climate Change (UNFCCC). The COPs aim to assess the progress made in reducing greenhouse gas emissions and to encourage further commitments, in accordance with countries' common but differentiated responsibilities and their respective capabilities.
- The COP 21, which will take place in Paris in December 2015, brings very high expectations as it could be the first time for countries to sign a universal agreement on climate in over 20 years of UN negotiations!
